

WHAT ARE EMERGENCY MEETING LOCATIONS (NTP) AND WHERE CAN I FIND THEM?

NTPs are fixed or mobile locations that, in case of an emergency/telephone network failure or area-wide power failure, are manned by employees of the city administration, fire brigade and aid organisations. From here, emergency calls can be relayed by radio.

In addition, you can receive information on the current situation at the NTP. Make a note of your closest NTP so that you don't lose time in an emergency.

HOW SHOULD I PREPARE?

The Ministry of Civil Protection and Emergency Assistance has compiled helpful articles on this topic.

Here you will find a lot of information on the topic of self-protection and self-preparedness.

WARNING THE POPULATION

Siren signals

Warning Siren
Howling sound (rising and falling)
1 minute

All Clear Signal
Continuous tone 1 minute

Emergency Services Alarm
Continuous tone 1 minute - 2 x interrupted

Mobile Phone Broadcast

In case of grave danger, you can receive a warning message sent directly to your mobile phone via Cell Broadcast, provided it is switched on and can receive Cell Broadcast messages.

Warning App **NINA**

The official state NINA Warning App allows you to receive important emergency updates from the Civil Protection in emergency situations.

Emergency Vehicles / Announcements

Emergency vehicles from the fire brigade, police and aid organisations will be on the road throughout the city with loudspeaker announcements to inform and warn.

Emergency Radio

In case of a nationwide power failure, emergency information is broadcast on radio stations and can be received in analogue form via crank, battery or car radios, for example.
